Subject: Re: Patrick Bayou Fish Tissue Data
Date: 09/11/2009 04:10 PM

The current PCB project apparently managed to catch one hardhead catfish sample at station 17149 in Patrick Bayou, about 0.8 km from the HSC, very recently. They were not able to catch the three samples desired, not yet anyway. I only have a summary of sampling completed, no results; it may still be at the lab. Might be months before all the verification and QC is done and data sets delivered to me.

The dioxin project sampled at station 11273, just outside the bridge at mouth of Patrick Bayou. That data is in the attached zip file, which contains virtually all the water quality data collected by the dioxin project. The tissue data I have found is in two Access data base files in the Appendix B folder: I think one is the data, the other a summary or crosstab of it. The specific file names are "dioxin WO4 database.mdb" and "DioxinWO7Data.mdb"
If you want the summary report that describes the data, and contains some tables of it too, that can be downloaded as a PDF from <http://www.tceq.state.tx.us/implementation/water/tmdl/26-hscdioxin.html> at the link "Dioxin: all data (14.1 MB)"

That is all I know of at this time.

Larry,

The only data I know about, besides the upcoming PCB data, is data that might have been collected during the dioxin/PCB TMDLs at station 11273. I seem to recall a few crabs or something. I think the JDG already has this old stuff, though, because I think it was in one of the first documents that they provided in the Superfund process that listed all the information we had on Patrick Bayou at that time. I vaguely remember picking apart their tissue numbers in the appendix because they didn't quite match what you had.

I am sure we are all waiting anxiously for the results of the recent fish sampling inside Patrick Bayou, though.

Linda

Well, if I do, I will share it with anybody. But I will have to paw through data files from several large projects to find out, unless somebody can give me a hint about where to look or why I am understood to have some.

If Larry has fish tissue data, I want him to share it with me, too.

Linda

Larry,

I understand that you have fish tissue data from Patrick Bayou. I was hoping that you could share that information with the Patrick Bayou JDG. Thanks.

Bob Piniewski
